This livestock feeder is designed for livestock feeding management, feed handling and feeding management in livestock farms, pig houses, poultry houses. Its practical structure is intended for reliable day-to-day operation.

### Características

- Automatic operation helps reduce repetitive manual work.
- Purpose-built structure for routine use as a livestock feeder.
- Simple construction supports convenient installation, operation and maintenance.
- Designed for regular use in livestock-production environments.

### Vantagens

- Improves day-to-day operating efficiency.
- Reduces manual workload and repetitive handling.
- Stable construction supports reliable routine operation.
- Suitable for routine use in commercial and large-scale livestock operations.

### Descrição

Suitable for feed handling and feeding management in pig farms, poultry houses. Install the unit securely according to the feeding-system layout and avoid overloading or blockage. Remove residual feed and inspect moving or connecting parts regularly to maintain stable operation.
